Moscow, September 12. The World League "Mind Free of Drug" presents two fall premieres

On September 12, the first series of educational TV reality **Doctor Life**, about the rehabilitation and return to normal life of drug addicts, will be presented on the Doctorlife.tv website. Eight destructive personalities from around the world will do their best to eliminate existential fear, get cured and find their place in the society. They will undergo a complete course of treatment and rehabilitation in accordance with Prof. Nazaraliev's method, which is considered to be the most progressive and tolerant treatment of drug addiction in the world.

The main motto of the project is as follows: **“We do not promise – we give a chance”**. Typical patients of addiction clinics are treated confidentially. But the participants of the **Doctor Life** project will appear in front of the world without hiding anything. Viewers will get a chance to see all the stages of treatment. In addition to this, patients and their relatives will share their feelings that they experience during the treatment process and talk about their illness background. In the struggle against their own depraved ego in the pursuit of a new healthy life, the **Doctor Life** participants will not hide their feelings, emotions and fears. Viewers will find out about the hopes and dreams of drug addicts.

The premiere of the first episode of **Doctor Life** is to be presented in seven world languages at DoctorLife.tv, the official website of the project. The project coincides with the 25th anniversary of the professional career of the Prof. Jenishbek Nazaraliev, and embodies the mission of the World League to form a social matrix of conscious psychological immunity and negative attitude towards drugs in the society. The shooting period of the project is to take 35-40 days and will take place in the MCN Nazaraliev Medical Centre, located in Bishkek, the capital city of Kyrgyzstan.

The second premiere of the World League "Mind Free of Drugs" and the MCN Nazaraliev Medical Centre will be the blog of addicted woman dying of AIDS. Fatal disease, thirty years of experience of injectable drug use, alcoholism, multiple law violations and public morals, inevitably brought down the blog character and author Lyudmila to the rejection and aggression on part of the society. Being on the edge of death, Lyudmila has recognized that her only loved one is her son who is ashamed of his mother and her past.

Lyudmila's son tries to reconcile himself to his elderly mother's murky past, accept her against all the odds. Immense love for his mother is mixed with a sense of shame for her and her past. How to cope with such a conflict? **“Please, don't die, Mommy!”** begs Lyudmila's son, the other character of the blog. Will he be able to build his own life different from his mother's life? Like any man, he has a right to be happy.

The blog "Don't die, Mommy!" is to be presented in seven world languages at MayaPlanet.org, the official website of the project. While this diary is being kept, highly experienced psychoanalysts, AIDS doctors and drug therapists will attend the participants. The blog readers will be able not only to get to know about drug users' household and everyday life and about the true life realities of HIV positive people, but also they will see a genuine drama of two people living among us.

The World League "Mind Free of Drugs" is supported by the most prominent people from around the world. The Board of Trustees of the League are: His Holiness Dalai Lama XIV, Recipient of the Nobel Prize of 2001 Kofi Annan, Former Director General of the UNESCO Koïchiro Matsuura, Former Governor of California (USA) Arnold Schwarzenegger and many other prominent individuals.

Please, visit Doctorlife.tv to find the Reality TV **Doctor Life** project's blog, sincere blogs of the project participants, reports from the shooting area, exclusive interviews with the producers and other information. The blog "Don't die, Mommy!" is available at Mayaplanet.org.

In turn, I am ready to answer all your questions.

Sincerely,

Aiperi Shadyhanova,

PR manager
